

RMC FORGED 110476080

Master cylinder 110476080 peerless controllability

A forged brake master cylinder dedicated to riders who love the thrill of the track. Forging is a plastic deformation process of metal that increases mechanical strength and final quality. Always reliable, this forged and machined master cylinder provides maximum responsiveness and perfectly adjustable braking under all conditions of use with excellent linearity between the force the rider applies to the lever and the braking response, resulting in an extraordinary braking feel.
